

839 Ed Low Dr

Additional Info

A small section of the lot has already been cleared near the front center of the lot. The lot is about 214 ft wide at the street, and there is a section of land on each side of the current clearing that has not been cleared yet.

The lot basically starts where you'll see a little parking spot that was recently created just off the side of the street, and it ends near the electric pole where the street makes a hard right turn.

A local insurance agent confirmed that flood insurance is not required as the special flood hazard area Zone AE ends at the shoreline.

Please feel free to go walk the lot anytime if you'd like. The gate code is 7596.
